

For non sinden user follow these steps to properly setup borderless mame

1. Right click on any arcade game in launchbox
2. Goto file management > open game folder
3. Go to Root of Mame0259LG folder
4. There is 3 folders and 1 file that need name changing.
5. Take artwork folder, rename to artwork\_sinden and rename artwork\_nonsinden to artwork
- 6a (if you have trouble reloading for Area51, lethal enforcers or other arcade games make the change for the Ini folder. If you have no issues reloading then leave

Ini folder as it is)

6. Same for the Ini and cfg folder

7. Change Mame.ini file to mame\_sinden, and mame\_nonsinden to mame.

8. This will also change nes and sega master system to borderless full screen as well.

9. For rest of emulators just go into reshade and turn off borders or layers (whichever one is checked)

10. Borders video cover this.
